

Viridian Biotechnologies

Consultancy Services

Viridian Systems can now offer an extensive range of consultancy services to our clients. Our expert staff have extensive experience with treatment of hazardous wastes and over several years have specialised in the treatment of landfill leachate. For leachate treatment, our staff have designed and built several types of treatment plant including:

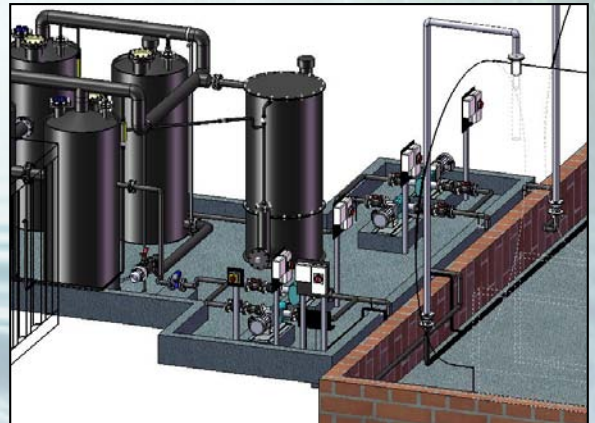

- Sequencing batch reactors (SBRs).
- Aerated lagoons.
- Fixed film biofilters.
- Membrane bioreactors (MBRs).
- Methane stripping plants.
- Physico-Chemical Treatment

Our design service also includes:

- 3D modelling and AutoCAD design drawings.
- P&ID drawings.
- Process design.
- SCADA controls.

We can also offer the following services:

- Obtaining discharge consents.
- Preliminary design of treatment plants.
- Selection of suitable contractors.
- Project management for building plant.
- Managing treatment plants (COTC holder available).
