

Viridian Systems Limited

1

The **Silt Pro II** was set up on site quickly with minimal fuss and began the process of removing silt from the Knock Out Pot whilst the system remained live! This represents a considerable cost saving as no gas engines had to be turned off - unlike alternative methods of de-silting!

2

The **Silt Pro II** Filter bags soon filled up removing large amounts of silt and debris that had collected within the Knock Out Pot.

3

As you can see the **Silt Pro II** was successful in removing silt and fibrous materials. This is an effective method of silt control - helping you maintain effective condensate management!
